### **About the GrassRoots Series**

As the national governing body (NGB) of organized water skiing in the United States, USA Water Ski plays a vital role in the awareness and growth of its nine sport disciplines. There are thousands of towed water sports enthusiasts who are not involved competitively that spend their weekends behind the boat. The revamped and re-energized GrassRoots Series will help USA Water Ski and its local organizing clubs (LOCs) connect with the recreational water sports enthusiasts.

The GrassRoots Series is designed to be a fun, family-oriented experience for all water sport enthusiasts. USA Water Ski looks to grow organized towed water sports at the grassroots level by providing a turnkey package that encourages LOCs to host GrassRoots events through budget relieving incentives, and offering various marketing tools to help attract new participants to their events.
